

SHAIK JAREENA

SENIOR AI AUTOMATION ENGINEER / WORKFLOW ARCHITECT

Portfolio: aurora-ai-portfolio.vercel.app | GitHub: JAREENA-SK

PROFESSIONAL SUMMARY

SENIOR AI AUTOMATION ENGINEER / WORKFLOW ARCHITECT

Highly analytical and infrastructure-first Senior Software Engineer with 3.5+ years of experience designing enterprise-grade automation pipelines at global leaders like Qualcomm and Micron. Specialized in building advanced Intelligent Automation frameworks using n8n orchestration, custom Python backends, and stateful Supabase databases. Proven track record of architecting end-to-end AI applications featuring complex asynchronous API integrations, multi-agent systems, and secure edge hosting via Vercel and Cloudflare. Combines elite debugging and technical execution with strong project coordination and team leadership skills, capable of driving autonomous systems from concept to robust production deployment.

CORE TECHNICAL STACK

AI Automation: n8n, Agentic AI, OpenAI API, workflow orchestration, API integrations **Backend:** Python, Supabase, state management, data pipelines, Next.js, TypeScript

DevOps: Jenkins, CI/CD, Git, Bitbucket, Linux, Vercel, Cloudflare **Delivery:** Jira, debugging, sprint coordination, technical mentoring

PROFESSIONAL EXPERIENCE

Software Engineer II | Qualcomm - 1.5 years

- Developed and supported engineering workflows using Python, C, Linux, Git and Jira; performed complex debugging and automation-oriented problem solving.
- Collaborated across engineering teams to track issues, coordinate delivery and maintain reliable development workflows.

Software Engineer | Micron - Enterprise Automation

- Built and supported Python automation and infrastructure workflows using Jenkins, Bitbucket and Linux, including CI/CD and source-control processes.
- Investigated technical failures and contributed to reliable, repeatable enterprise automation pipelines.

Senior Software Engineer | Sevitech - Technical Leadership

- Led technical work, planning and mentoring; supported delivery tracking, issue resolution and alignment between engineering execution and project goals.

Technical Project Mentor | HireReady Program

- Guide learners through project planning, implementation, documentation, presentation and viva readiness; mentor on Python, Git, Jira and practical development workflows.

SELECTED AI & AUTOMATION PROJECTS

NoorFlowAI - AI Content Automation Platform: AI-driven content operations platform with approval workflows, scheduling, video automation, YouTube integration, analytics and growth tooling.

AI Sales OS - Client Acquisition Platform: Client-acquisition operating system covering lead discovery, qualification, demos, follow-ups, proposals, payments, onboarding and pipeline visibility.

Aurora AI Portfolio - Installable PWA: Responsive Next.js portfolio deployed on Vercel as an installable Progressive Web App.

HireReady - Final Year Project Hub: Guided project-learning platform for CSE/ECE students covering selection, structured build support, documentation and viva preparation.

EDUCATION

Bachelor's Degree - Y.V. University

ADDITIONAL STRENGTHS

Technical leadership • Project coordination • Team mentoring • Complex debugging • Problem solving • Communication • Remote collaboration • Continuous learning
